### *Henri Giraud*

*The origins of Champagne Henri Giraud go back to 1625. Contemporary of Henri IV and his descendants, the Hémart family settled permanently in Aÿ at the beginning of the 17th century.*

*Claude Giraud, 12th generation of the Giraud-Hémart family, today presides over the destiny of this Champagne House. With its unique expertise in the vinification of great Champagne cuvees in new oak barrels, the Henri Giraud House is now working on winemaking in small containers, either of terracotta or ovoid sandstone to optimize the exchange between the wine and its lees.*

*With only 250,000 bottles, these champagnes are sought-after by collectors and lovers of great wines from around the world. The whole vineyard is worked in sustainable viticulture and under certification of high environmental value (HVE).*

*“Let nothing be banned and nothing be obligatory – just make good wine naturally” – Henri Giraud*

# Coravin Selection

## Wine by the Glass

### Why Coravin?

The systems' principle is that it allows you to pour just one or two glasses without removing the cork. This is done by a small, thin needle that penetrates the cork and through pressure decants the wine. The pouring needle also replaces the removed wine with a neutral gas called Argon. Argon is the third most abundant gas in the world, behind only Nitrogen and Oxygen. It's non-toxic, odourless and non-flammable meaning it will have no detrimental effect on either you or the wine. By not removing the cork the wine stays as fresh as if no liquid had ever been removed.
